Ministry of the Environment
of the Czech Republic

The conference aims are:

- To analyse the present and future situation of soil and water conservation on a worldwide scale while taking local specifics into consideration.
- To analyse the effects of population growth, human activity and climate change on soil and water in the context of the demands of sustainable farming, water and food supply.
- To promote and increase collaboration between scientific organisations, policymakers, the general public and practitioners.
- To design goals, strategies and directions for conservation of soil and water as basic irreplaceable natural resources for current exploitation and the needs of future generations.
